Return on investment

- Components
- Income from fixed income instruments
- Income from investment properties
- Income from other classes
- Income included in the shareholders' equity
- Stock
- Return
- Rate
- Comprehensive return

Current return declined amounting to 3.9% (4.3% at 31 December 2011).
 This trend was due to lower current income from all asset classes and, in particular, to the effects of the de-risking of the portfolio.
 The contribution to the result of the period from harvesting operations improved, amounting to +0.3% (+0.6% at 31 December 2011).
 The comprehensive return, which includes changes in value for the period recognized through profit or loss and other comprehensive income, amounted to 3.9% (4.3% at 31 December 2011).
