

Accounting principles

Basis of presentation

The Generali Group's consolidated financial statements at 31 December 2012 was drawn up taking into account the Legislative Decree No. 209/2005 empowered ISVAP (now IVASS) to give further instructions for financial statements. In this yearly report the Generali Group prepared its consolidated financial statements and Notes in conformity with the aforementioned Regulation. As allowed by the aforementioned Regulation, the Generali Group believed it appropriate to supplement its consolidated financial statements. The consolidated financial statements at 31 December 2012 were approved by the Board of Directors on 13 March 2013. The consolidated financial statements at 31 December 2012 is audited by Reconta Ernst&Young S.p.A., the approved auditor.

Consolidated financial statements

The set of the consolidated financial statements is made up of the balance sheet, the profit and loss account, the cash flow statement and the Notes. The Notes, which are mandatory as minimum content established by ISVAP (now IVASS), are presented in the consolidated financial statements. Comparative figures are restated compared to those presented in the financial statements at 31 December 2011. This yearly report is drawn up in euro (the functional currency used by the entity that prepares the financial statements).

Consolidation area

Based on the IAS 27, the Consolidated financial statements include the figures for both the Parent company and its subsidiaries. At 31 December 2012, the consolidation area decrease from 523 to 498 companies, of which 451 are subsidiaries. Changes in the consolidation area compared to the previous year and the table listing companies included in the consolidated financial statements are presented in the Notes. Consolidation methods

Investments in subsidiaries are consolidated line by line, whereas investments in associated companies and in joint ventures are consolidated using the equity method. The balance sheet items of financial statements denominated in foreign currencies is translated into euro based on the exchange rates at the end of the period. Instead, the profit and loss account items are translated based on the average exchange rates of the year. The exchange rate differences arising from the translation of the statements expressed in foreign currencies are recognized in profit or loss.

Exchange rates of the balance sheet

Exchange rates at the end of the period (€)

Country	Exchange rate (€)
Australia	1.0000
Canada	1.0000
China	1.0000
Denmark	1.0000
France	1.0000
Germany	1.0000
India	1.0000
Italy	1.0000
Japan	1.0000
USA	1.0000

Exchange rates of the income statement

Exchange rates of the income statement (€)

Country	Exchange rate (€)
Australia	1.0000
Canada	1.0000
China	1.0000
Denmark	1.0000
France	1.0000
Germany	1.0000
India	1.0000
Italy	1.0000
Japan	1.0000
USA	1.0000

Line-by-line consolidation method

The subsidiaries as well as the special purpose entities where the requisites of effective control are applicable are consolidated line by line. Control is presumed to exist when the Parent Company owns, directly or indirectly through subsidiaries, more than 50% of the voting rights. The consolidation of a subsidiary ceases commencing from the date when the Parent Company loses control. In preparing the consolidated financial statements:

the financial statements of the Parent Company and its subsidiaries are consolidated line by line. For consolidation the following items are eliminated in full:

- the carrying amount of the Parent Company's investment in each subsidiary and the Parent Company's minority shareholders' interests, together with their share of profit are shown as separate items.

Subsidiaries consolidated line by line are acquired using the acquisition method. The acquisition cost is represented by the fair value of the consideration transferred. The assets acquired and liabilities assumed in a business combination are initially recognized at acquisition cost. Based on the IAS 27, the acquisitions of further minority interests of subsidiaries already consolidated line by line are recognized at cost. Similarly, in line with what it has been stated above concerning the purchase of further minority shares, the difference between the carrying amount of the investment and the fair value of the consideration transferred is recognized in profit or loss.

Consolidation using the equity method

Investments in associates and joint ventures are consolidated using the equity method. An associate is an entity over which the investor has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the entity. A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control. Under the equity method, the investment in an associate is initially recognized at cost (including goodwill) and then adjusted to reflect the investor's share of the associate's profit or loss. Dividends received reduce the carrying amount of the investment. After application of the equity method, the Group's share of the associate's profit or loss is recognized in profit or loss. Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at fair value. Foreign currency transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate at the reporting date. Differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of differences arising on the translation of monetary items that are measured in terms of historical cost in a foreign currency are translated using the historical exchange rate at the date of the transaction.
